

Riparian Assessment	2008/2009						
PROJECT	STREAM NAME	STREAM SIGNIFICANCE	STREAM QUALITY		LENGTH OF ADDED IN-STREAM BREAKS (m)	LENGTH OF ADDED CROSSINGS (m)	CORRIDOR WIDTH TARGET ACHIEVED
			PRE-DEVELOPMENT CONDITION	REHABILITATION OBJECTIVES			
Doonside	Northern Creek	Category 3	Of low condition and quality, act as stormwater drains from surrounding suburbs, stream truncated by Doonside Road, majority of vegetation has been cleared. Truncated by dams. Ephemeral, featureless.	Reconnect creek with Eastern Creek, revegetate, improve water quality, removal of weeds and erosion, removal of dams. Bioretention.	0	0	10m - yes
Doonside	Southern Creek	Category 3	Of low condition and quality, act as stormwater drains from surrounding suburbs, stream truncated by Doonside Road, majority of vegetation has been cleared. Truncated by two online dams, sedimentation, ephemeral, featureless. Areas of erosion and salinity evident.	Stabilisation of modified sections, revegetation and ensuring the predevelopment flood hydrology is maintained. Bioretention. Remove dams.	0	0	10m - yes
