

11 April 2026

Dear resident

Footpath closure for stormwater upgrade works

We're upgrading stormwater infrastructure behind Claymore Public School to improve drainage and support the growing community. From Monday 13 April, the footpath behind the school will be temporarily closed for around six months while these works are carried out. The works will be delivered by Devcon, on behalf of Landcom.

What you need to know

- The footpath will be closed for the duration of the works
- Clear signage will be in place to guide pedestrians
- There are alternative walking routes (as shown in the map on the back of this page)
- Access to the Claymore Youth Centre will be maintained

Why the works are needed

These works will improve how stormwater is managed in the area, helping to reduce flooding risks and support safer, more reliable infrastructure.

We know this closure may cause some inconvenience and thank you for your patience while we carry out these important works and continue making homes happen.

If you have any questions or concerns, please reach out to Amber Clarke, Communications & Engagement Officer on 02 9841 8659 or aclarke@landcom.com.nsw.gov.au

Yours sincerely

Kate Denney
Development Director
